

California State Park System

*Statistical  
Report*

2004/05 Fiscal Year

Planning Division  
California Department of Parks and Recreation  
P.O. Box 942896  
Sacramento, California 94296-0001

# Memorandum

**Date** : March 2006

**To** : Document Recipient

**From** : **Department of Parks and Recreation**  
Planning Division

**Subject** : 2004/05 fiscal year edition of the *Statistical Report*

Attached you will find a copy of the 2004/05 fiscal year edition of the *California State Park System Statistical Report*. With its revisions and added materials, this document succeeds the 2003/04 fiscal year edition.

This publication provides a comprehensive collection of statistical information designed to provide interested individuals or groups with a tool to analyze various aspects and components of the State Park System. The information contained in this edition of represents a snapshot of the System on June 30, 2005. As of this 'snapshot' date, the State Park System had 255 classified units and 23 major unclassified properties, for a total of 278 areas. The Statistical Report is a historical publication that represents State Park System data relating to the 2004/05 fiscal year.

The *Statistical Report* provides information relating to acreage, public use facilities, visitor attendance and revenue at the unit, sector, district and statewide levels. Information such as unit number, staffing levels and unit acreage per county is also provided to help the State Park System researcher.

New to this year's edition, you will find an expanded table of contents that we hope will shorten your search time.

The staff of the Planning Division has made every effort to ensure the accuracy of the *Statistical Report*. This publication is a collaborative effort consolidating data from multiple divisions. Even with our exhaustive efforts, it is possible that errors can occur. If you have any questions or suggestions concerning this edition of the *Statistical Report*, please contact us by calling (916)653-9901 or emailing [planning@parks.ca.gov](mailto:planning@parks.ca.gov). We in the Planning Division hope that you will find the *Statistical Report* an indispensable aide for State Park System information.

## INTRODUCTION

The central purpose of this edition of the annual Statistical Report is to provide information on the basic parameters of the California State Park System (State Park System) for a specific period of time, the 2004/05 fiscal year. This year spanned the period of July 1, 2004 through June 30, 2005. As indicated in Chapter 3, some of the data used to portray the State Park System for this fiscal year is current as of the beginning of the fiscal year, July 1. Some are current as of the last day of the fiscal year, June 30. Most of the State Park System data reflects the measurement of activity that took place between these two points in time, during the course of the entire fiscal year.

Like any responsible organization, the State Park System needs to clearly know the scope, scale and dimensions of its activities and operations. To have this knowledge, the State Park System needs information, as accurate as can be reasonably and economically obtained, on its assets, its activities and its products.

Collectively, this information will give a measure of the State Park System - what its various resources are, what it does with them, and what are the useful results of its activities. Such information will allow this organization to broadly view itself and the workings of the State Park System at a specific point in time and, when comparing this view with those taken at other points in time, will allow one to see and to perhaps analyze the changes that have occurred.

It is a convention that the official number of classified units and major unclassified properties that constitute the State Park System is established on the first day of each fiscal year, July 1, and does not change during that year. The few parks and properties that may in actuality be added to (or removed from) the System during the year will not be officially included in the official total until the first day of the following fiscal year.

Reflecting this convention, **the State Park System contained a total of 255 classified units and 23 major unclassified properties, for a total of 278 areas, during the 2004/05 fiscal year.**

For management purposes, these units and properties were grouped into districts, many of which further organized them into smaller groupings called sectors. The districts and sectors used in this publication reflect the organizational arrangement of the System's "field" on the last day of the fiscal year, June 30, 2005.

This Statistical Report will focus exclusively on information that is related to or reflects on the State Park System's "field" areas and activities, the system's 278 classified units and major unclassified properties. Specifically excluded from the

data on the System's "field" activities and expenditures is the small number of the functions that serve the field and are situated in field locations outside of headquarters, but are functions which are not associated with specific units or districts, or which are considered an extension of the headquarters' responsibilities. These functions include the three regional service centers (which provide unit-level planning and technical assistance), the three regional communication centers, and the statewide personnel training center at Pacific Grove. Also excluded are the Museum Collections Section and the Archaeological Lab and Collections.

The operation and management of the State Park System parklands and facilities requires perhaps 80% of the effort and expenditure needed to operate the California Department of Parks and Recreation (Department) in which the State Park System is administratively located. Most of the remainder of the non-"field" costs excluded from this report are those for accomplishing the wide array of administrative and control functions that take place at the Sacramento, California headquarters. Also excluded are the costs of the Department's activities in managing those of its functions which are not at all related to the State Park System, mainly the administration of the state's many park and recreation grant programs, the provision of technical assistance services to local park and recreation agencies, and any expenses related to the Department's Office of Historic Preservation.

During the 2004/05 fiscal year, the State Park System was host to many tens of millions of visitors, cost hundreds of millions of dollars to manage and operate, employed more than two thousand staff people, and generated tens of millions of dollars in fees and other revenues.

During the course of this fiscal year, the funds and staff allocated at the field level were applied to many critical objectives involving the protection and management of the State Park System's natural and cultural resources, as well as to the provision of high-quality resource-based outdoor recreation opportunities for park visitors. At the same time, staff provided the park visitors with a variety of direct services ranging from interpretive programs to public safety.

This report provides the end of the fiscal year's numerical information on many of the State Park System's most basic activities, revenues and expenditures, reflecting certain of the System's more measurable "inputs" and "outputs" for the collective 365-day period.

Some of this information, such as park acreage and visitor attendance, is available at the level of the individual unit or property. Other information, such as a park's operating costs and staffing numbers, is not available at the level of an individual park or property. Such information is available only at the district level, where such resources are allocated as a single amount, so as to allow the

manager to make flexible sub-allocations to various units based on needs that shift throughout the year.

In general, this Statistical Report contains the most basic data for the 2004/05 fiscal year, as well as some analysis of this information. It also contains reference to important specialized System data that is not widely available, but which may be directly obtained from identified staff members.

Chapter 1 highlights the salient points found in the Report's data for the 2004/05 fiscal year, data which is found in detail in Chapter 3, and makes some analysis of this data's substance and significance. Where appropriate, comparisons may be made with similar data sets from earlier annual statistical reports or from other sources.

Chapter 2 briefly describes the size and organization of the State Park System as it existed at the end of the 2004/05 fiscal year, on June 30, 2005.

Chapter 3 is the core of this Report, its multi-page table providing the selected statistical information on the 278 classified units and major unclassified properties that constituted the State Park System during the 2004/05 fiscal year. The data categories and their sequence on the table are arranged so as to provide maximum comparability with the layout of previous statistical reports.

Chapter 4 provides important information about the basic data that appears in the table in Chapter 3. This includes definitions of the data categories and the terms that are used. Where important, the data collection methodology is described. This chapter also provides information on the known limitations in the scope and accuracy of this data, and indicates the source(s) within the Department where this data originates.

Chapter 5 provides information about and access to a variety of system-related data which is beyond the necessarily limited scope of this Statistical Report. The State Park System creates a wide variety of other data and information, often specialized in nature and not widely known or available. This chapter provides references and citations which refer the reader to a variety of more specialized data on the State Park System's field activity, management and operations.

Chapter 6 provides information on the history of the Department's annual Statistical Report series and on its predecessor documents. It provides specific titles of documents containing basic data reaching back many decades.

Appendix A briefly refers the reader to Appendix A of the 2001/02 *Statistical Report*, which provided key data for the fiscal years from 1990/2001 through 2000/01, when such reports were not prepared.

Appendix B provides information on the methodology and the results of the detailed inventory used to develop data on the State Park System's three basic types of public use facilities –overnight use (mainly camping), picnicking, and (non-motorized) trail mileage – used in this report. This survey also contains information on the capability of these facilities to accommodate visitors, of their “carrying capacity.”

Appendix C provides, as a matter of having a complete record of the State Park System's classified units, basic information for its 81 classified internal units, which are specialized units situated within the boundaries of certain other classified units. This appendix also identifies and provides limited data on a handful of small or minor properties which in 2004/05 were owned by the Department but which were not associated with any of the State Park System's set of 278 classified parks and major unclassified properties.

Appendix D contains an organization chart of the California Department of Parks and Recreation, included here mainly to indicate the relationship of the State Park System's field units to the rest of the system and to the Department as a whole.

Appendix E provides references to sources of statistical data and other information about the State Park System and to collections of written materials which exist both internal to and external to the California Department of Parks and Recreation. This information is very different from and does not duplicate the “Other Available Information” provided in Chapter 5 or the “Selected Data” referred to in Appendix A.

A new and revised edition of this Statistical Report will be produced following the close of each fiscal year. Readers' suggestions for additions and improvements to this regularly issued document may be made to the California State Parks, Planning Division at P.O. Box 942896, Sacramento, CA 94296-0001 or by emailing [planning@parks.ca.gov](mailto:planning@parks.ca.gov).

## CHAPTER 1 - SUMMARY AND ANALYSIS

The purpose of this Statistical Report is to provide selected data sets which portray the fundamental measures of the California Department of Parks and Recreation for the 2004/05 fiscal year. Collectively, this data shows the scope and scale of the State Park System, its activities and operations, and offers implications as to the benefits derived by its users. This large amount of data has been assembled in the extensive table that is the basis of Chapter 3.

The purpose of this chapter is to draw from the data found in Chapter 3 and to highlight its major findings. In many cases, data from the 2004/05 report will be compared with that from the 2003/04 report, revealing changes over time. Where possible, some commentary will be made on the data or its trends, bringing useful perspective to the information presented.

The ability to compare data through time will be limited due to the lack of detailed statistical information from the eleven years 1990/01 through 2000/01, during which time statistical reports were not prepared (see Appendix A). In the coming years, with statistical reports again prepared annually, comparisons and analyses between fiscal years will become more meaningful and useful.

This summary and analysis is limited to the system-wide totals of the various data sets. For definitions of the data categories, see Chapter 4.

\* \* \* \* \*

Number of Units and Properties - The total figure of 278 basic classified units and major unclassified properties indicates an increase of 2 properties and a removal of 1 property. This constitutes a 0.36% increase in the total number of properties. The changes to the State Park System were all major unclassified properties. The additions were:

- Cottle Ranch (recorded 1/28/2004) - Santa Clara County (unit # 229): 136.527 acres,
- Sutter Buttes (Hughes/Peace Valley)(recorded 9/26/2003) – Sutter County (unit # 132): 1,784.50 acres,

and the removal was:

- Mill Creek (unit #111) added to Del Norte Coast Redwoods SP.

Acreage, DPR-Owned - The total of 1,299,648.6 acres reflects an increase of ~1.51% (19270.76 acres) over the previous year. The major acquisitions were:

- Joshua Hills project – Riverside County: 3,438.13 acres to be added to the Indio Hills Palms property
- Willow Creek project – Sonoma County: 3,373 acres added to Sonoma Coast SB

- Tulloch Ranch project – San Diego County: 2,079.76 acres added to Anza-Borrego Desert SP
- Horse Canyon project – San Diego County: 1,298 acres added to Anza-Borrego Desert SP
- San Lorenzo River Redwoods project – Santa Cruz County: 1,069 acres added to Castle Rock SP

Acreage, Other - The total of 248,083.44 acres shows an increase of ~19.29% (40,119.19 acres) from the previous fiscal year report.

Total Acreage - The State Park System's total acreage, a data category not reported in the table, is the total of the two previous figures. At 1,547,732.04 acres, this total is an increase of ~4% (59,389.94 acres) from the previous fiscal year.

Waterfront Feet - The total of the four categories of waterfront footage is 8,597,445. (the equivalent of 1,628.3 miles), a 29.29% gain over the previous year. The waterfront length related to the shoreline of lakes and reservoirs ("L") is 3,394,464 linear feet (or 642.89 miles), a .18% gain. The length of frontage on the Pacific Ocean and its major bays and estuaries ("O") is 1,659,806 linear feet (the equivalent of 314.36 miles), a 6.63% gain. The length of river footage ("R") is 1,722,565 linear feet (the equivalent of 326.24 miles), a 3.13% gain. The length of submerged footage ("S") grew to 1,820,410 linear feet (the equivalent of 344.8 miles), an increase of 1,785,960 feet. This large increase is a result of the Department's new lease agreement with the State Lands Commission to manage the submerged footage at Malibu Lagoon SB.

All waterfront feet reported only reflect actual footage that is owned or managed by the Department. Some units within the system include waterfront footage that is managed by entities outside the Department.

Individual Camp Sites - A total of 14,334 individual sites, as defined in Chapter 4 and determined by the survey described in Appendix B existed in the State Park System in the 2004/05 fiscal year. These data reflect a loss of 4.31% in individual camp sites from the previous year. This change is the result of both beach erosion and corrections to prior year's data.

Because of the way individual camp sites (sometimes labeled as "family camp sites") have been variously defined and counted over the last three decades, this figure cannot be usefully compared with any "information" earlier than fiscal year 2001/02. Over the last twenty years, estimates have run as high as 17,772 sites.

Group Camp Sites - A total of 271 such sites, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the State Park

System in the 2004/05 fiscal year. This indicates an increase of 2.65% over the previous year.

Non-Camping Overnight Facilities - There were 662 such facilities, as defined in Chapter 4 and determined by the survey described in Appendix B, existing in the State Park System. The number of non-camping overnight facilities increased 2.80% from the previous year. These facilities were a range of accommodations which include rooms in commercial lodging, various types of primitive shelters and the use of space in hostels.

Individual Picnic Sites - A total of 6,810 such facilities, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the State Park System. This reflects a .92% increase in individual picnic sites from the previous year.

Group Picnic Sites - A total of 192 facilities, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the System. These data show a 1.54% decline in group picnic sites from the previous year. This discrepancy is almost entirely the result of field unit respondents correcting their prior year's data, not of changes in the actual number of sites.

Non-Motorized Trail Miles - A total of 2,320 miles, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the System. This is 9.38% or 240 miles less than that reported in the previous year. This discrepancy is almost entirely the result of a significant change in the field managers' definitions of trails.

The Department's units receive funding for the improvements and addition of park roads. A significant amount of these roads are used for servicing the park. Over half of these service roads are jointly used as trails but to report them as trails would cause many facilities to lose funding opportunities. Therefore, while this publication must report 2,320 miles of trails, according to the restricted definition stated above, California Department of Parks and Recreation still maintains that, using a broader definition, roughly 3,800 miles of trails exist in the State Park System.

Visitor Attendance – Day Use - The total of 69,975,572 day use visits included both those who paid an admission fee and those who were admitted free. Roughly three-quarters of all day use visits are unpaid or free. This total figure reflected a drop of 6.51% over the previous fiscal year. While the explanation of this drop is conjecture, possible reasons include the continued fallout from the 02/03 fiscal year's fee increase or any combination of the many variables that affect visitor attendance.

Visitor Attendance – Camping - This figure reached a total of 5,940,053 overnight uses, a decrease of 13.54% over the previous fiscal year. Note that the camping

attendance contains only some of the overnight use of the system that takes place in structures, as explained in Appendix B. This situation makes it impossible to make a valid correlation between the total of overnight public use facilities and overnight visitor attendance.

Visitor Attendance – Total - This figure reached 75,915,625 a decrease of 7.10% over the previous fiscal year report.

It should be noted that the State Park System's unit-level attendance figures, with few exceptions, are based on estimates rather than actual counts. In addition, the total attendance for the State Park System as a whole is believed to be substantially underestimated. The circumstances surrounding both of these factors are discussed as part of the definition of "visitor attendance", found in Chapter 4.

Revenue - User Fees - The total of \$61,885,084 reflects an 18.05% increase over the previous fiscal year. While the visitor use fees increased during the 2002/03 fiscal year, the visitor attendance did not drop by a corresponding amount. Visitor fees did not change during the 2004/05 fiscal year yet revenue was up, while attendance was down.

Revenue – Concessions - The total of \$10,576,421 reflects a decrease of 12.48% over the previous year.

Revenue – Miscellaneous - The total of \$230,018 reflects a reduction of 18.12% over the previous year. The amount of miscellaneous revenue has been steadily declining for the past four fiscal years.

Total Revenue - The System's total revenue of \$72,691,523, the sum of the above three categories, reflects an increase of 12.20% from the prior fiscal year. The three revenue categories listed above, based on the Department's "earnings", constitute an important part of the State Park and Recreation Fund (SPRF).

Operating Costs: The authorized base budget for field operations was a total of \$162,668,664, an increase of 13.14% over the previous fiscal year.

Revenue as a % of Operating Costs - In the 2004/05 fiscal year, the total revenue was 44.7% of the field operating costs for the System as a whole, compared to 45.1% the previous fiscal year. This figure rises to 51% if the OHMVR districts are not included. Among the 18 individual non-OHMVR districts, the individual district figure ranges from a low of 3.6% to a high of 122.3%, with a median figure of 43.1%. In this group, only three districts were under 20% and seven were over 50%, with three of these districts over 75%.

Authorized Permanent Full-Time Positions - The total of 1,744.8 positions for the 2004/05 fiscal year reflected an increase of 1.31% over the previous year. The 2003/04 reporting period noted a 1.06% decrease in authorized permanent full-time positions.

Authorized Temporary Positions - In terms of person-year (PY) equivalents, a total of 759.7 positions reflected a decrease of 3.50% over the previous fiscal year.

## CHAPTER 2

# Park System Size and Scope

This page left intentionally blank.

## CHAPTER 2 - PARK SYSTEM SIZE AND SCOPE

At the commencement of and during the entire 2004/05 fiscal year, beginning on July 1, 2004, the State Park System consisted of 278 properties. Of these, 255 were units that have been classified. The other 23 were major unclassified properties for which classification as distinct new units could be anticipated at some future date. All of these specific units and properties are identified by name on Lists 1 and 2 of the July 1, 2004 edition of the publication *Planning Milestones for the Park Units and Major Properties of the California State Park System*. The number and distribution of these properties, by classification, is as follows:

State Park (SP)	83
State Beach (SB)	64
State Historic Park (SHP)	49
State Recreation Area (SRA)	31
State Reserve (SR)	17
State Vehicular Recreation Area (SVRA)	8
State Historical Monument (SHM)	1
State Seashore (SS)	1
Wayside Campground (WC)	1
State Cultural Reserve	0
Underwater Recreation Area	<u>0</u>
Classified Units	255
Major Unclassified Properties	<u>23</u>
<b>Total – State Park System</b>	<b>278</b>

The California Resources Code, Sections 5019.50 *et seq*, describes and characterizes each of the nine classifications listed above. The code indicates in general terms the types of features and general qualities inherent in a unit that is given a particular classification, and also provides guidance as to the sort of management to be accorded to such a unit.

State Vehicular Recreation Areas are technically part of the State Vehicular Recreation and Trails System which, by legislation, is organizationally separate from the State Park System. For this reason, much of the data for the two systems are collected separately. The data for the two systems; however, is brought together for the purposes of this statistical report.

Located within and being an integral part of many of the State Park System's 255 units with the classifications indicated above, there were an additional 81 units which were identified by three other classifications. These other classifications call for enhanced, specialized protection and management for the noteworthy features or qualities found in the unit in question. Commonly termed "internal units", and found on List 3 of the *Planning Milestones* publication cited above, the number and distribution of these units, by classification, is as follows:

Cultural Preserve (CP)	13
Natural Preserve (NP)	58
State Wilderness (SW)	<u>10</u>
Total – Internal Units	81

The State Wilderness units, in addition to being part of the State Park System, are also part of a larger California Wilderness Preservation System, as defined in Public Resources Code Section 5093.3.

In addition to the lands noted above, which constitute the official State Park System, the California Department of Parks and Recreation owns a number of small or minor properties that are not related to any of the System's classified units or major unclassified properties. Information on these minor State Park System properties appears in Table C-2, in Appendix C.

The State Park System's 278 classified units and major unclassified properties are administered through districts, groupings based largely on their geographic proximity. Larger districts are often subdivided for management purposes into smaller areas called sectors. During the 2004/05 fiscal year, the units and properties of the State Park System were administered through 23 districts (5 of them being Off Highway Motor Vehicle Recreation (OHMVR) districts managing the units classified as SVRAs). The 18 non-OHMVR districts contained, collectively, a total of 57 sectors.

It is important to note the manner in which any change in the size or composition of the State Park System is officially determined; a matter alluded to in this report's Introduction. Because the California State Park and Recreation Commission may name and classify any property at any of its meetings, and new properties may come into system ownership at any time during the year, the size of the State Park System may change at any time over the course of a fiscal year. To transform this natural periodic fluctuation to an administratively useful once-a-year change, the Department has adopted a convention which deems the State Park System to have a single size and composition, unchanging over the course of an entire fiscal year.

By this convention, the official size and composition of the State Park System is changed only once a year, on each July 1. To accomplish this, the changes that have been made during a year, as well as candidates for changes still needed to be made in updating the State Park System's official list of units and properties, are all identified in late June.

These changes can include the addition, removal or combining of specific units or properties. They can include changes of unit or property names, and changes in unit classifications. Such changes, both already accomplished or proposed, are discussed in late June of each year by the Department's Planning Policy and Programming Committee. Its recommendations for desirable changes are submitted near the end of the fiscal year to the Director of the Department of Parks and Recreation for approval. Those changes which are approved by the Director in late June become official on July 1. These changes modify the existing set of State Park System units and properties and the new official set for the next fiscal year appears in that year's July 1 edition of the Department's annual *Planning Milestones* publication.

Changes in the State Park System's set of districts, their boundaries or names, are the result of administrative decisions, proposals for which are approved by the Deputy Director of Park Operations and the Director of the Department of Parks and Recreation. Such changes may be made at any point in the fiscal year. The same is true for changes made in the boundaries of the sectors within districts. The districts and sectors reported in this statistical report and shown on its accompanying map are those that were in place on June 30, 2005, at the end of the 2004/05 fiscal year.

## CHAPTER 3 - BASIC PARK SYSTEM STATISTICS

The following set of pages presents a single table which contains data providing the basic statistics which measure selected aspects of the scale, activity and operation of the California State Park System during the 2004/05 fiscal year.

In this table, the individual districts of the basic State Park System, as they existed at the end of the fiscal year, are presented alphabetically and, within each district, its sectors are arranged alphabetically. When classified units and major unclassified properties are managed out of a district office, that district office is - for the purpose of this report only - considered a *de facto* sector. Within each sector, the classified units and major unclassified properties are listed alphabetically. Internal classified units do not appear in this table, to avoid the double counting that would result in including their statistics along with those for the unit in which they are situated. Basic information on internal classified units appears in Appendix C.

The table has four parts that are joined sequentially. The first part provides information, on a district by district basis, for each of the non-OHMVR districts. The second provides the totals for each of the non-OHMVR districts and the totals for all of the non-OHMVR districts, combined. The third provides both the detailed information and the totals for the five districts of the OHMVR Division. The last part combines the totals for all 23 districts, giving the total for the State Park System as a whole. To this total is added the information for minor system properties which, when combined, give the grand total for all of the properties of the California Department of Parks and Recreation.

For each entry, the names of the classified units are followed immediately by their classifications, in abbreviated form. The names of the major unclassified projects appear as names only, without being otherwise indicated by a word like "project" or "property" unless that designation has been officially added to the name of the project or property.

Thirty-one units and properties in the State Park System (23,603.02 acres) are operated not by the state but instead by local government park agencies or by non-profit organizations, acting through individual operating agreements with the Department. The names of these units and properties appear in *Italics*. Their acreage data is included in the State Park System's subtotals and totals, but in many cases there is no available information on their other characteristics - their facilities, visitor attendance, operation costs, and the like.

For certain of those units and properties which are operated by the State Park System, no attendance is reported. These are usually small, isolated, little developed and little-visited units where counting visitors or collecting entrance fees would not justify the costs of doing so.

Most of the data in the table is available and reported on the basis of the individual unit or property. However, in cases of data on such topics as operating cost and staffing, the reported data is of the allocations of these resources made by headquarters to the district. This allows the district to be flexible in allocating (and reallocating) its funds to its sectors and individual units in the course of the year. Therefore, there are no unit-level allocations shown in these categories. Also, in the case of revenues, some of these monies come not into individual units but instead into the district or sector offices; these are recorded as district or sector income rather than unit income.

Some of the categories of information in this chapter's table, which appear as column headings, contain data which is current as of either the beginning or the end of the fiscal year. The remainder of the data categories reflects activity which occurs during the course of the fiscal year, between the first and last day.

Categories with data which are current as of the first day of the fiscal year, July 1, are those which define the State Park System for the entire year. This information corresponds exactly with that found in Lists 1 and 2 of edition of the publication *Planning Milestones for the Park Units and Major Unclassified Properties of the California State Park System* which is dated July 1 of the same year. These categories are:

- Unit name and classification, or name of the major unclassified property
- Unit number
- County or counties in which the unit or property is located

The following categories of information in the table show what is valid or in place as of the last day of the fiscal year, June 30. These categories are:

- District name
- Sector name
- Acreage - state owned
- Acreage - other
- Waterfront feet – separated into lake (“L”), ocean (“O”), river (“R”) and submerged (“S”).
- Public use facilities - individual camp sites
- Public use facilities - group camp sites
- Public use facilities - non-camping overnight facilities per individual unit (e.g. rooms, cabins, yurts, etc.)
- Public use facilities - individual picnic sites

- Public use facilities - group picnic sites
- Public use facilities - non-motorized trail miles

The last categories of information indicate activity undertaken, revenue generated, or resources expended over the 365-day course of the year, from July 1 through June 30. These categories are:

- Visitor attendance - day use
- Visitor attendance - camping
- Revenue - user fees
- Revenue - concessions
- Revenue – miscellaneous
- Revenue - total
- Operating costs
- Revenue as a percent of operating costs
- Authorized staffing levels - permanent full-time
- Authorized staffing levels - temporary, in PY (person-year) equivalents

Definitions of these data categories may be found in Chapter 4.

Two symbols which appear in the table, defined as follows, are used so as to leave no space or cell empty.

- A zero ("0") is put in a space where there could be a number, indicating that the actual number is zero.
- A dash ("-") is put in a space where the appropriate information does not exist or is unavailable, either because it is not collected (e.g. attendance of small or remote units) or because it is not computed for record-keeping purposes (e.g. the unit allocation of a lump-sum amount of district funding).

# CHAPTER 4

## Basic Statistics- Definition of Terms

This page left intentionally blank.

## CHAPTER 4 - BASIC STATISTICS – DEFINITION OF TERMS

This chapter provides definitions or characterizations of each of this report's data categories, along with how their information is created and processed within the Department. Where appropriate, background information on certain data categories is provided to allow the reader to know something of what is behind the data and to understand the strengths and weaknesses of the numbers that are available for use. These definitions appear below.

\* \* \* \* \*

Park Name – With rare exception, classified units are named by the California State Park and Recreation Commission, based on recommendations made by the Director. Very few units have been named by the California Legislature. The unit's name usually reflects a geographic feature or an individual or group of people historically associated with the unit. Prior to their classification, newly acquired properties are given temporary names for working purposes. Information source: California State Park and Recreation Commission; Office of Acquisition and Real Property Services, California Department of Parks and Recreation.

Park Classification - With rare exception, units are classified by the California State Park and Recreation Commission, based on recommendations made by the Director. Very few units have been classified by the California Legislature. These recommendations are based on the options found in Public Resources Code Section 5019 *et seq.* Each unit is given a classification that best reflects the unit's primary values and the purposes for which the property was acquired and is to be managed. Information source: California State Park and Recreation Commission

Unit Number - The "unit number" is the last three digits of a unique six-digit number assigned by the Accounting Services Section to each of the classified units and major unclassified properties of the State Park System. Such six-digit numbers are also assigned to the Department's various other organizational components - divisions, sections, and offices. A major purpose of these numbers is to identify and track money, staff and other resources allocated to and used by these various activity centers. Information source: Accounting Services Section, California Department of Parks and Recreation.

County - This shows the county or counties in which the unit or property is located. The abbreviations for the county names conform to the standard used throughout California state government. Information source: Office of Acquisition and Real Property Services, California Department of Parks and Recreation.

Acreage- This is the surface acreage of the lands and waters which constitute each classified unit and major unclassified property. This information is based on

county assessor's maps, descriptions, and any notations regarding easements or claims on these properties. The acreage of the lands in the California State Park System is also recorded, on a parcel-by- parcel basis, in the assessor's books of the counties where the lands are situated.

The addition or removal of acreage from the State Park System's database is a continuous process. In any instance, it is accomplished at the time that the appropriate records are received and processed by the Department. This may not coincide with the time of the recording of deeds, payment of funds, or movement of other paperwork. Information source: Office of Acquisition and Real Property Services, California Department of Parks and Recreation.

- DPR-Owned – those lands which are owned in fee by the Department. Some of these lands, however, may be subject to easements and certain other restrictions.
- Other – those lands which are owned in fee by another government agency, non-profit organization or private entity, but which are operated as part of the State Park System through an agreement with the Department. The form of these agreements includes leases, permits, easements, operating agreements and memorandums of understanding.

Waterfront Feet - Water, in the form of lakes, streams and ocean shoreline are important park features, from both an environmental and recreational standpoint. Data on the presence and magnitude of this feature is measured in terms of its frontage, the edge it presents to or within the unit or property. The four types of waterfront feet are reported separately - for natural lakes and reservoirs ("L"), for rivers ("R"), for the shore of the Pacific Ocean and its major estuaries ("O") and for waterfront feet that are submerged ("S"). The data in this column is presented in actual footage. Information source: Office of Acquisition and Real Property Services, California Department of Parks and Recreation.

Public Use Facilities - The properties of the State Park System provide a wide range of public use facilities, including picnic sites, camp sites, overnight shelters, trails, boat launching ramps, restrooms, roads, parking areas, interpretive centers and campfire centers. The three most common general types of public use facilities are those used by visitors for overnight use, for picnicking and for moving about the park on trails, by means of foot, horse or bicycle.

Earlier statistical reports were inconsistent in their definitions of these three types of facilities. Such reports did not have data on certain subcategories of facilities; in the case of overnight use facilities, group camps were seldom reported and data on structural overnight facilities had never been collected. Commencing with the 2001/02 *Statistical Report*, data for public use facilities of those used by visitors for overnight use, for picnicking and for moving about the park on trails, by means of foot, horse or bicycle have been specifically included. To obtain the

current and detailed data that was needed for this Report, a special unit-by-unit web survey was accomplished in the summer of 2005, seeking information that was current as of June 30, 2005. The details of this survey are contained in Appendix B. Information source: Planning Division, California Department of Parks and Recreation.

- Individual/Family Camp Sites - This category is the sum of seven survey subcategories. Each subcategory is briefly described here and fully described in Appendix B.
  1. Primitive/Undeveloped – each site accommodates up to eight people and two vehicles; tent space, stove, table and nearby piped water, chemical or vault toilet. Some of these amenities may not be available in every case.
  2. Developed – each site accommodates up to eight people and two vehicles; designated parking, tent or RV space, stove, table and nearby piped water, and restroom with flush toilets and hot water; may include showers and laundry sinks.
  3. RV Hookup – each site accommodates up to eight people and two vehicles in a designated space and provides paved spur for RV, as well as hookups for electricity, water and sewage disposal.
  4. Environmental/Trail – a designated primitive site in a relatively undisturbed setting, accessible by foot path or trail.
  5. Hike/Bike – a designated area with tent space, table, fire rings or stove with water and toilet facilities nearby, accessible by foot path or trail.
  6. Floating Campsites – tent space, table, stove, and toilet facilities on a floating platform, accessible only by boat.
  7. Dock Berths, Offshore Mooring Buoys – a place to tie up a boat, which itself may serve for overnight use; some units with mooring buoys have an assigned campsite on land.
- Group Camp Sites – This category is the sum of two subcategories. Each subcategory is briefly described here and fully described in Appendix B.
  1. Tent or RV Use - primitive or developed – an area with space for many tents or RVs, providing many tables, stoves, water sources, and restrooms, designed to be used by a large group of people; often available by reservation only.
  2. Horse camps – primitive or developed – as above, but with added facilities needed for the management of horses.
- Non-Camping Overnight Facilities - This includes tent cabins, rustic cabins, shelters, yurts and bark houses, as well as lodges, motel facilities, hostel facilities, and modern cabins.

- Individual or Family Picnic Sites – These are small areas with tables, stoves or fire rings, with nearby parking, water and restrooms. These sites are sometimes used by groups but are intended mainly for individuals or families.
- Group Picnic Sites - These are large areas with a number of tables, stoves or fire rings, with nearby parking, water and restroom facilities, often used by reservation only.
- Non-Motorized Trails – This category is the sum of three subcategories. These facilities are unpaved pathways or trails for use by one or more of three types of users: foot, horse and bicycle. This category includes designated interpretive trails, as well as short trails which may be paved or hardened for the use of visitors with disabilities. It includes unimproved (dirt or gravel) service roads and fire roads which are used as trails, but does not include paved service roads that are not intended as trails but may be unofficially used as such by visitors. It does not include any trails used by off-highway motor vehicles. This definition or characterization specifically defines service and fire roads as part of this subcategory yet this year's survey respondents failed to report them as such (see explanation in Chapter 1 – Summary and Analysis, Non-Motorized Trail Miles).

Note that the State Park System Planning Division's survey of public use facilities provided certain figures that were different from those which had been developed in recent years. The data developed by the Planning Division's survey will be considered to be correct and official.

Visitor Attendance - Data on visitor attendance reflects an estimate of the number of individual visits (not the number of individual visitors) to the units of the State Park System during the fiscal year. Using this approach, an individual visiting three units in a day is recorded in the attendance data three times rather than one.

Attendance data is collected at the unit level, sent to the district offices, and thereafter conveyed to the Field Services Division in headquarters. Some units or districts may collect a variety of more detailed attendance or visitor use data (e.g. attendance at a specific area or facility, like a boat launching ramp), but only the unit-wide data on three required categories – free day use, paid day use, overnight use - are conveyed to headquarters to be used for system-wide records. Source: Field Services Division, California Department of Parks and Recreation.

The two different categories of visitor attendance reported in this Statistical Report are generated in different ways, and their consistency and accuracy differ widely.

- Day Use – This is the number of day (non-overnight) visits to the unit in question. "Day use", as used in this column, includes both free day use and

day use for which a fee is paid for entry into the park. Day use includes park entry by any means, by motor vehicle of any type, on foot, on bicycle, by boat or on horseback. A single visit is counted regardless of the length of stay or variety of activities undertaken. Historically, approximately 30% of day use is paid and the remainder is free. Day use admission based on the use of annual passes is included in this data.

- Camping - This is the number of overnight visits to the unit in question by visitors using the many types of sites and structures listed above, as well as using temporary overflow areas.

Not all units collect visitor attendance information for day use and overnight use in the same way. In a few instances, usually historic units with per-person admission charges, there are actual counts of visits. In most units, however, attendance figures are the result of making estimates, using various techniques and producing results of widely different levels of accuracy. The estimation techniques may range in quality from one unit to the next and they may be changed at any unit at any time. While the accuracy of these figures has substantial limitations, it is believed that in the aggregate, over time, orders-of-magnitude and broad trends in visitor use can be determined with some validity.

It is clear that, for the entire State Park System, total attendance is underestimated for three reasons.

1. Little or no data is collected from State Park System-operated units which are small, remote and little used, where gathering this information would not be cost-effective;
2. Data is rarely collected from units which, in large part or in their entirety, are managed not by the State Park System but by another agency or organization through an operating agreement. Many of these units are heavily used ocean beach units with substantial attendance.
3. The failure to report all of the visitors who spend the night in a unit not through traditional camping but instead through the occupancy of such structures as lodges, cabins, yurts, and hostels. A new reporting system should improve this situation.

Revenue - Revenue at the field level is the income flowing into a park unit, or into a sector or a district office as a result of parklands and facilities being used by visitors or organizations for a wide range of approved purposes. Information on field-level revenue is generated at the district level and is reported to the Accounting Section and subsequently to the Budget Section in Headquarters. Information source: Budget Section, California Department of Parks and Recreation.

The revenue figures used in this report are year-end totals, current as of June 30 of the year, as reported each year in the "Actual" column in the *Governor's*

*Budget.* Four of the six CalStars revenue categories shown there are needed for this Statistical Report, reflecting revenue coming directly from the “field.” In the budget document, there is separate information for the basic 18-district State Park System and for the 5-district OHMVR Division, information which is combined for the purposes of this Statistical Report. A third and very small category revenue, from the Department’s systems of Sno-park facilities, is not included.

- Fees – These are admissions and use fees paid by the visitor, including fees for admission, parking, camping and the use of other park facilities such as boat launch ramps and pay showers. This category includes money from the sale of day use admission passes and Hearst Castle ® tours. This revenue source is represented by CalStars category 140600, State Beach and Park Service Fees.
- Concessions – The bulk of this revenue category is the income from the rentals paid by concessionaires, private entrepreneurs who under contract provide goods and services to park visitors on State Park lands. This category also includes the leases of System lands, dwelling rental, and receipts for special events and filming. In the OHMVR Division, the bulk of this money comes from the sale of OHV licenses (“green stickers”) and from the interest on funds which it has in reserve. This revenue category is represented by CalStars category 152300, Miscellaneous Revenues from Use of Property & Money.
- Miscellaneous – This revenue is the combination of two CalStar categories, 161400, Miscellaneous Revenue, and 164200, Parking Violations.

Revenue earned by or funds transferred to the State Park System at the headquarters level is not reported in this Statistical Report.

Operating Costs - These are funds from the Department’s annual budget which provide for the operation and management of the “field” portion of the State Park System, as described in the Introduction to this Report. These monies fund the staff, equipment, utilities and supplies needed to serve the visiting public, to maintain and renovate facilities, and to protect and manage the System’s natural and cultural resource base. The operating costs in this Statistical Report are reported each year in the “Actual” column in the *Governor’s Budget*. Information Source: Budget Section, California Department of Parks and Recreation.

These funds are allocated by the California Department of Parks and Recreation Field Services Division directly to the individual districts, thereby allowing each district the flexibility to make allocations and reallocations throughout the year to its various units based on changing need.

Revenue as % of Operating Costs - A computation made to indicate in a rough way the degree to which a State Park System as a whole or any of its districts are "self-supporting", a point where revenue equals or exceeds operating costs. The district figure ranges widely, depending largely on the revenue-generating capability of the units and properties within a district. Also important in determining the size of this figure is the degree to which the operation of the district's set of units is particularly labor-intensive and whether the district's units and properties are located close to one another or are widely distributed. Source: Planning Division, California Department of Parks and Recreation computations.

Staffing - The operation and management of the units and properties of the State Park System, as well as the district and sector offices, requires a large and diverse professional staff. The two staffing categories of concern here are permanent full-time staff (indicated as the number of positions) and temporary staff (measured in terms of person-year equivalents). Information on the annual quantity of what might be deemed another type of staffing, that of non-paid volunteer work, is available from the Interpretation and Education Division.

The data provided in this report is for positions that were authorized rather than those that were actually filled during the fiscal year. These figures are reported annually in the *Governor's Budget*. Information source: Budget Section, California Department of Parks and Recreation.

- Permanent, full time – These are individuals who have permanent civil service status in a wide range of job classifications. They work year-around for the standard 1816 hours per year.
- Temporary/PY equivalent – "Temporary" includes permanent intermittent, seasonal and retired annuitant positions. Many of these employees are normally required during the parks' busy season, when visitor use is heaviest. A person-year (PY) equivalent is 1816 hours of work, whether it requires two, three or more individuals to accomplish it.

## Other Available Statistics

This page left intentionally blank.

## CHAPTER 5 - OTHER AVAILABLE INFORMATION

In addition to the basic statistics or data sets shown in the table in Chapter 3, the State Park System regularly collects a wide variety of other useful information which records and measures many of its activities and operations. Some of this information is portrayed in descriptive or graphic terms as well as in numerical form. Certain material is available through the Department's Internet and Intranet sites, with a wider range being available directly from specific sources within the Department.

### A. Internet/Intranet

Two general sources of information about the Department and the State Park System are the Department's Internet Web site and its internal Intranet site. These sites contain useful information about the Department and the State Park System. They contain information about the individual park units and their attractions, and about a variety of special topics of current relevance to the State Park System. Also available is information about the Department's organizational components and some of the work which they do. These latter references make available the contents of a variety of reports, studies and data sets, as well as general information about the Department and its State Park System. Most of the contents of the Internet and Intranet are expanded and updated on a periodic basis.

The Internet site is available to the general public at <http://www.parks.ca.gov>. The Intranet is available only for those with access to the Department's internal communication system, and is found at <http://isearch.parks.ca.gov>. With both sites, the approach to seeking information is to access the site and conduct a search to determine if it contains what is wanted.

### B. Direct Sources

A wide variety of specialized data and information can be obtained directly from the organizational units of the Department. In the following listing, selected areas or topics of information are specified and very briefly described. In the case of each item, the Department's organizational source or location of the information is indicated, in terms of the appropriate division, office, section or unit. In addition, a specific resource person is indicated, along with their phone number and email address. These organizational and personal references are current as of the time of this writing and are subject to change.

Most of the information referred to below may be made available upon request. Some of it may be available immediately in hard copy, while much of it exists only in a computer database which can be accessed only by the program manager. In many cases, the level and format of the data can be tailored to the specific needs of the individual making the request.

These more specialized areas of information and their organizational sources are as follows.

Accidents - Included here is information from the field on calls for assistance, reports taken and filed, and actions taken as a matter of public safety. Assistance may include first aid, getting needed help, search-and-rescue efforts and finding lost individuals. Incidents involving motor vehicles and boats are reported separately in two different categories.

- Contact: Randy Sederquist, Public Safety Section, Field Services Division, California Department of Parks and Recreation, Sacramento (916) 653-0398; [rsede@parks.ca.gov](mailto:rsede@parks.ca.gov).

Aerial Photo Files - Aerial photographs provide important information on land use and conditions in and around State Park System lands. Aerial photographs are routinely purchased by the Department for many planning and management purposes. The primary repository and catalogue system for 9"x9" color, infrared, and black and white aerial prints are maintained by the Natural Resources Division in Sacramento.

- Contact: Jim Trumbly, Natural Resources Division, California Department of Parks and Recreation, Sacramento (916) 653-0875; [jtrum@parks.ca.gov](mailto:jtrum@parks.ca.gov).

Archaeological Collections - This database contains a master list of all archaeological artifact collections, by park unit, which is maintained by the Department's Archaeological Collections Research Facility. This archive also includes all of the notes, records and photos related to archaeological collections and fieldwork.

- Contact Glenn Farris, Senior State Archaeologist, Archaeology, History & Museums Division, California Department of Parks and Recreation, West Sacramento (916) 375-5921/5922; [gfarr@parks.ca.gov](mailto:gfarr@parks.ca.gov).

Condition Assessment Database - In 2002, the Department conducted an extensive system-wide survey of natural resources in the State Park System to establish a baseline on the general condition of park lands and detailed information on selected natural resource features. Information on such things as rare and endangered species, non-native plants and animals, natural habitats, geologic features and pollution, was collected from park resource specialists and

entered into a database. Information on over 195 of the System's park units is included in the database.

- Contact: Art Fong Jr., Natural Resources Division, California Department of Parks and Recreation, Sacramento (916) 653-9454; [afong@parks.ca.gov](mailto:afong@parks.ca.gov).

Cooperating Associations - This database contains information on the formal independent nonprofit citizens' groups which contract with one or more park units to assist in the funding of those units' interpretive and educational programs and services. Information is available on the identity of each association, its name, address, phone number(s) and email address. Financial information, as reported by the associations, is also available.

- Contact: John D. Mott, Cooperating Associations Program Manager, Partnership Support, Interpretation and Education Division, California Department of Parks and Recreation, Sacramento (916) 654-5397; [jmott@parks.ca.gov](mailto:jmott@parks.ca.gov).

Crimes - This database contains information on calls made, reports made, and actions taken by park staff relative to crime in and near State Park System units. Data includes information on investigations, warnings given, and arrests for alleged misdemeanors and crimes.

- Contact Randy Sederquist, Public Safety Section, Field Services Division, California Department of Parks and Recreation, Sacramento (916) 653-0398; [resed@parks.ca.gov](mailto:resed@parks.ca.gov)

Cultural Resources: Sites, Structures, Registrations - Information on the number and type of cultural resources in the State Park System is found in the *Index to Historic and Archaeological Resources Owned by the California Department of Parks and Recreation*. This index lists, by park unit, the number of (1) archaeological sites, (2) historic structures, (3) California Historic Landmarks, (4) National Register and California Register properties, (5) National Historic Landmarks, and (6) Cultural Preserves.

- Contact: John W. Foster, Senior State Archaeologist, Archaeology, History & Museums Division, California Department of Parks and Recreation, Sacramento (916) 653-4529; [jfost@parks.ca.gov](mailto:jfost@parks.ca.gov)

Facilities – Accessibility - In compliance with the federal Americans with Disabilities Act, the department in 2000 made a very detailed survey rating the accessibility by disabled persons of the facilities in the then-266 units of the State Park System. The level of access was rated as high, medium or low and the information used to set priorities for remedial action.

- Contact Christina Aceituno, Staff Services Manager II (Managerial), Accessibility Section, Acquisition and Development Division, California Department of Parks and Recreation, Sacramento (916) 445-4144; [caceituno@parks.ca.gov](mailto:caceituno@parks.ca.gov)

Facilities – Data for Maintenance Purposes - For the purpose of programming the Department's facility maintenance activity, the tens of thousands of structures, utilities and other built facilities in the State Park System were surveyed and recorded. In this particular information system, numbers of similar facilities (e.g. individual campsites) were defined as a single facility.

- Contact Valerie Bradshaw, Technical Services Section, Field Services Division, California Department of Parks and Recreation, Sacramento (916) 653-8542; [vbrad@parks.ca.gov](mailto:vbrad@parks.ca.gov).

Facilities – Museum Collections - Data on the condition of facilities used to house museum collections in the State Park System is found in the Museum Collections Facility Index (MCFI) database. Facilities which house collections are surveyed each year for compliance with museum standards for environmental conditions, security, fire protection, and documentation.

- Contact: Bruce Stiny, Supervisor (acting), Archaeology, History & Museums Division, California Department of Parks and Recreation, West Sacramento (916) 375-5903; [bstiny@parks.ca.gov](mailto:bstiny@parks.ca.gov).

Facilities – Three Visitor Facility Types in Detail - Through specific annual surveys, actual counts are made of the numerous different types of (1) overnight accommodation facilities, (2) picnic facilities and (3) the number and cumulative length of non-motorized trails in each classified unit and major unclassified property of the State Park System. This data includes information on the capacity of overnight and picnic facilities to accommodate visitors.

- Contact Alexandra Stehl, Planning Division, California Department of Parks and Recreation, Sacramento (916) 651-8713; [astehl@parks.ca.gov](mailto:astehl@parks.ca.gov).

Flora and Fauna Databases - California State Parks and its contractor, the University of California, Davis, developed computer applications to record names of vertebrates and vascular plants that are found within park units. To date, CalParks Flora and CalParks Fauna contain inventory information for over 170 park units, a total of over 50,000 records. A companion application detailing actual observations of plant and animals within park units, "Observe-it", holds records for over 90 park units. This second database has not been as widely used; at present there are over 4,500 animal observations and 190 plant records in the Observe-it database.

- Contact: Cynthia L. Roye, Associate State Park Resource Ecologist Natural Resources Division, California Department of Parks and Recreation, Sacramento (916) 653-9083; [croye@parks.ca.gov](mailto:croye@parks.ca.gov).

Incidents - This database contains information on public assistance events in park units that are not covered in any other public safety category, such as accidents or crimes.

Contact Randy Sederquist, Public Safety Section, Field Services Division, California Department of Parks and Recreation, Sacramento (916) 653-0398; [rsede@parks.ca.gov](mailto:rsede@parks.ca.gov).

Interpretive programs - Data is available on twelve types of formal and informal programs that take place in park units, things such as guided hikes, craft demonstrations, Junior Ranger programs and off-site school programs. Information is provided on the number of each type of program given, hours of programming completed, the characteristics of the presenters and visitor attendance at the programs.

- Contact: John Werminski, Regional Interpretive Specialist, Interpretation and Education Division, California Department of Parks and Recreation, Sacramento (916) 653-8959; [jwerm@parks.ca.gov](mailto:jwerm@parks.ca.gov).

Legislative Districts - Each State Park System unit and property is located in one or more of three types of legislative districts - U. S. Congressional districts, State Senate districts and State Assembly districts. Information is available on the districts in which any park or property is located.

- Contact Kerry Dorsey, Legislation Office, California Department of Parks and Recreation, Sacramento (916) 653-6887; [kdorsey@parks.ca.gov](mailto:kdorsey@parks.ca.gov).

The Museum System (TMS) database - Information about California State Parks' artifact and photographic collections, archaeological sites, and paleontological sites is available on "The Museum System," a database managed by the Cultural Resources Division. The database contains records of over 400,000 objects and over 12,000 sites located throughout the State Park System. Images are linked to approximately 100,000 records. The database may be accessed by authorized State Park employees through the wide-area network (WAN) or Internet connections.

- Contact: Yuk-Hoi (Winnie) Yeung, Supervisor (acting), Archaeology, History & Museums Division, California Department of Parks and Recreation, Sacramento (916) 654-4728; [wyeun@parks.ca.gov](mailto:wyeun@parks.ca.gov).

Park Features, Attractions and Associations - Information on a wide range of categories of features and attractions found in units of the State Park System (e.g. visitor centers, Native American sites, habitat types, blacksmithing demonstrations) is found in the 310-page *Park-to-Park Index*.

- Contact: Mary Helmich, Interpretive Programs Manager, Interpretive Planning and Programs, Education and Interpretation Division, California Department of Parks and Recreation, Sacramento (916) 653-3913; [mhelm@parks.ca.gov](mailto:mhelm@parks.ca.gov).

Photographic Archives - Thousands of images of park units, cultural artifacts and important park-related persons are available. Media includes b/w prints and negatives, 35mm slides and color prints from slides.

- Contact: Will Jorae, Museum Curator I, Interpretation and Education Division, California Department of Parks and Recreation, Sacramento (916) 375-5930; [wjorae@parks.ca.gov](mailto:wjorae@parks.ca.gov).

Reservations for Campsites, Hearst Castle ® - A large share of the system's campsites and all of the tours of Hearst Castle ® are available by reservation. Information is available on the number of camp units subject to reservation and the number of reservations actually made for camping or Hearst Castle ® tours.

- Contact Jimmy Low, Reservations Manager, Field Service Division, California Department of Parks and Recreation, Sacramento (916) 654-1603; [jlow@parks.ca.gov](mailto:jlow@parks.ca.gov).

## CHAPTER 6 - HISTORY OF THIS REPORT

The first annual statistical report for the State Park System was published for the 1961-62 fiscal year. Prior to that, information on the System's acreage, facilities, attendance, income, expenditures and staffing was available largely from scattered sources within the Department and were on various occasions combined into a single publication for use in special studies or reports. Exhibit 1 provides a list of the documents which are recognizable as earlier statistical reports.

Following the publication of the State Park System's first specific annual statistical report, for fiscal year 1961-62, identical or similar reports were issued covering the years through 1989-90. Most of these reports provided information for a single fiscal year, although some covered three or four fiscal years in a single volume. In a multi-year report, some items of data for a given fiscal year may be different than that which had been presented for that particular fiscal year in a previous year's report. This reflects the fact that the data was modified after the close of the original fiscal year by the addition of new information arriving after the end of the year. By convention, the data that is considered valid and used is that which is reported for the year in which the report was published, usually the smallest figure in any such series.

Over this 29-year period, these statistical reports were altered somewhat as to their title, the range of their information and their formatting. As the series developed, there was more analysis of the subject year's data and its comparison with that from previous years.

Due to an administrative reorganization and subsequent budgetary limitations, the creation and publication of the series of annual statistical reports ceased in 1990. During the following years, it became clear that such a report was needed, that it was very useful to have such information assembled annually and made readily available to staff at all levels, as well as to interested persons outside of the department.

In late 2002, the Department's Planning Division undertook to reinstitute this publication, to develop and publish once again a State Park System Statistical Report with at least the scope of the last one in the series, published eleven years earlier. The 2001/02 *Statistical Report* was the first product of this new effort.

The scope of the document was expanded to provide information and analysis well beyond that found in any prior statistical report for the State Park System. Among these additions are:

- The formatting of each district's units and properties (where appropriate) in terms of the sectors into which the district was organized at the end of the fiscal year;
- Very detailed information on the definitions, source of and quality of each set of basic data, often with cautions as to its use;
- Information on the availability, source and quality of a wide range of regularly collected State Park System data that is important but the inclusion of which was beyond the scope of the basic data set of the statistical report; and
- A more detailed analysis of the year's basic data and some comparison with relevant data from earlier years, an effort that will be more useful in the coming years.

As mentioned in the Introduction, the statistics in this Report are considered the Departments data "of record" and will be used as the basis for the reports, studies and analyses subsequently developed by Department staff.

# APPENDICES

This page left intentionally blank.

## APPENDIX A - SELECTED DATA – 1990/91 TO 2000/01

As indicated in Exhibit 1, there were no issues of the State Park System annual statistical report published during the eleven fiscal years from 1990/1991 through 2000/2001. Thus, the important data which they would have contained is not available. This data gap makes it difficult to quickly find or construct a year-by-year series for the report's critical data categories, such as acreage, visitor attendance, revenue, operating costs and the like.

So that this missing data would not remain forever unavailable, an effort was made to locate it in the Department's hardcopy or electronic records. To locate or to create after the event at least some portion of these missing data sets, a search was made of the active or archived records of the Department. Appendix A of the 2001/02 *Statistical Report* contains a number of important categories of State Park System information that were located or created, thereby filling in as well as is possible the gap caused by the missing statistical reports. Those needing these data should consult that report.

As indicated in the 2001/02 *Statistical Report*, there are a variety of problems which made impossible the creation of some of the missing data in a context and format which matches that of this present document. There are many limitations in the historic data, and some of these limitations would apply even if the annual figures were readily available. In many cases, the definitions of data terms were not clear or have changed over time, making difficult a good transition in a data set from one fiscal year to a subsequent year where new definitions apply. In other cases, there may be changes in the methods of collecting data from the original field sources and processing it at headquarters.

Below the system-wide level of data, at the district-level of information, there is an insurmountable problem of consistency in the geographic aggregation of earlier unit-level data at the district level. It is not possible to be consistent because of the various field-level management reorganizations which have taken place over the eleven-year period. These reorganizations have altered the number and configurations (and even names) of the districts, and thus changed the number and identity of the units and properties which each contains.

With these factors in mind, the eleven years of missing information for the key data sets which were identified or created were presented only at the level of aggregation which reflects the State Park System as a whole. Where, over the course of the eleven years there were changes in data definitions or collection processes, these matters were noted below the data tables as warning to the reader. In spite of the recognized, albeit unavoidable, shortcomings in this data,

it was considered the official data, the data “of record”, for the purposes they represent.

As indicated above, these eleven-year data sets were made available in Appendix A of the 2001/02 *Statistical Report* in five sections, using in the same sequence in which the data sets appear in the table in this Report’s Chapter 3. These sections are:

1. Acreage
2. Public Use Facilities
3. Visitor Attendance
4. Revenue - Fees, Concessions, Miscellaneous
5. Operating Costs and Staff Levels

Where the reader seeks more detailed data than was provided in these tables, contact should be made with the Department’s most appropriate division, office or section identified in Chapter 5 & Appendix E.

## **APPENDIX B - PUBLIC USE FACILITY SURVEY – FY 2004/05**

To obtain the Public Use Facility information needed for the present Report, the Department's Planning Division made an exhaustive unit-by-unit survey in the summer of 2005 to get exact figures for the following types of visitor facilities:

- Overnight use facilities – individual (or “family”) and group campsites, as well as a variety of specific types of shelters, structures and commercial lodging accommodations
- Picnic facilities – individual (or “family”) and group
- Trails – mileage of paths and unimproved roadways available to users other than those using off-highway vehicles

An electronic survey was completed by appropriate field staff for every classified unit and major unclassified property, information provided would reflect the situation as it was on June 30, 2005. An example of the survey questions appear on the following pages.

As shown the survey, this instrument broke these three broad categories down into twenty-two subcategories, each of which was carefully defined so as to be mutually exclusive of the others. The instrument also sought information on the “visitor capacity” of each subcategory of overnight use and day use facility. This figure reflects the number of people (or in one case, boats) who could occupy the facilities at one time, a factor that is sometimes termed a facility’s “instantaneous capacity.” The following 2004/05 Unit Facility Survey summary indicates the totals for each category and grouping of categories.

As indicated in the definition of public use facilities in Chapter 4, nineteen of the twenty-two subcategories were combined into the six categories of public use facilities reported in the present document. Because they were by their nature open-ended and poorly defined, and thus not subject to being precisely counted, the two subcategories of overflow camping were not used in the Report.

This survey did not seek information on trails used by off-road vehicles because many of these facilities are not well defined and in some cases are indistinguishable from the “volunteer trails” from cross-country riding. The “Trails” data in statistical reports in fiscal year 1989-90 and earlier` had contained trails used by off-road vehicles.

# STATE PARK SYSTEM: 2004-2005 FACILITY SURVEY SUMMARY

## I. Overnight Use Facilities

### A. Individual/Family Camp Sites

		2004-05 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
1	<b><u>Primitive/undeveloped:</u></b> accommodates up to 8 people and two vehicles with a tent space, stove, table and nearby piped water and a chemical or vault toilet	2,973	21,312
2	<b><u>Developed:</u></b> accommodates up to 8 people and two vehicles with a tent space, stove, table, nearby piped water and a restroom with flush toilets and hot water; may include showers and laundry sinks	8,298	66,540
3	<b><u>RV Hookup:</u></b> accommodates up to 8 people and two vehicles with a paved spur for RV, stove, table and restroom with flush toilets and hot water; each site with electricity and water; sewer connection on site or in unit	1,120	8,351
4	<b><u>Environmental/Trail Campsite:</u></b> designated primitive site with a tent space, table, fire ring or stove and a pit toilet in a relatively undisturbed setting	397	2,844
5	<b><u>Hike-in or Bike Campsite:</u></b> designated area with a tent space, table, fire ring or stove, with water and toilet facilities nearby	224	1,697
6	<b><u>Floating Campsite:</u></b> tent space, table, stove and toilet facilities located on a floating platform, accessible only by boat	10	150
7	<b><u>Dock Berths or Off-shore Mooring Buoys:</u></b> number of boats that can be accommodated; the vessels can be self-contained or the overnight usage may be on a site on-shore	1,321	4,796
		<b>14,343</b>	<b>105,690</b>

### B. Group Camp Sites

		2004-05 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
8	<b><u>Tent or RV use - primitive or developed:</u></b> an area with space for many tents or RVs, providing tables, stoves or fire rings, access to water and toilet facilities; often used by reservation only	176	8,717
9	<b><u>Horse Camps - primitive or developed:</u></b> a group area reserved only or mainly for the use of horse groups, providing facilities needed for managing the horses; often used by reservation only	96	1,344
		<b>272</b>	<b>10,061</b>

### C. Overflow Camping Areas

		2004-05 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
10	<b><u>Enroute/Wayside Camping:</u></b> overnight, self-contained RV occupancy of day-use or other paved areas, limited and specified sites, single-night only; day-use tables and sanitation facilities available	486	3,919
11	<b><u>Open, Casual Areas:</u></b> unmarked portions of open fields, dirt or gravel areas where tents and RVs may be used sometimes; support facilities may be limited	41,408	332,861
		<b>41,894</b>	<b>336,780</b>

# STATE PARK SYSTEM: 2004-2005 FACILITY SURVEY SUMMARY

Continued

		2004-05 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
<b>D. Overnight (non-camping) Facilities - Structures</b>			
12	<b><u>Tent Cabins/Shelters:</u></b> semi-permanent tent on raised wood platform or three-sided shelter with roof, with a supporting table, cooking and restroom facilities	58	376
13	<b><u>Rustic Cabins:</u></b> enclosed building with appropriate facilities, some of which (restrooms) may be located outside of the building	105	487
14	<b><u>Yurts:</u></b> shelter with appropriate facilities, some of which (restrooms) may be located outside the structure	1	8
15	<b><u>Bark Houses:</u></b> Native American-type shelter with appropriate facilities, some of which (restrooms) may be located outside the structure	6	45
16	<b><u>Modern Lodge/Motel/Detached Cabins:</u></b> with rooms, usually for two occupants, with heating, electricity, hot and cold running water and restrooms; may be operated by concessionaires	431	1,490
		<b>601</b>	<b>2,406</b>

## **II. Picnic Facilities**

		2004-05 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
17	<b><u>Family Picnic Sites:</u></b> a small area with a table, stove or fire rings, with nearby parking, water and restrooms (sometimes used by groups but intended for individuals or families)	6,851	60,372
18	<b><u>Group Picnic Sites:</u></b> a large area with a number of tables, stoves or fire rings, with nearby parking, water and restroom facilities, often arranged for group use and often used by reservation only	201	16,378
		<b>7,052</b>	<b>76,750</b>

## **III. Non-Motorized Trails (on DPR lands only)**

		2004-05 Survey Responses	
		Number of Trails	Total Miles of Trail
19	<b><u>Maximum-use Trails:</u></b> pathways/trails for all three non-motorized user types: foot, horse and bicycle	533	1,071
20	<b><u>Limited-use Trails:</u></b> pathways/trails where only one or two user types are allowed and the other(s) prohibited	1,070	1,488
21	<b><u>Roadways and Firebreaks:</u></b> unimproved (dirt, gravel) roads and firebreaks which are designated as trails or used as trails by any or all of the three user types	683	1,584
22	<b><u>Vehicular Trails:</u></b> trails for all three user types that share right of way with official vehicles	138	251
		<b>2,424</b>	<b>4,394</b>

## APPENDIX C - INTERNAL UNITS, MINOR SYSTEM PROPERTIES

### Internal Units

As indicated in Chapter 2, during the 2004/05 fiscal year, the State Park System consists of 255 classified units and 23 major unclassified properties, for a total of 278 units and properties. Not included in these figures are three kinds of classified units, Cultural Preserves, Natural Preserves and State Wildernesses. These units, informally termed “internal units”, are portions of or lands internal to one of the System’s basic 255 classified units. The purpose of creating such units is to provide a higher level of protection to the resources than would be required by the classification of the “parent unit”, the unit in which it is located.

Internal classified units are not listed in the table in Chapter 3. They appear in List 3 of each annual edition of the Department’s *Planning Milestones* publication, available online at <http://www.parks.ca.gov/planning>.

There were 81 internal units in the State Park System on July 1, 2004. Since internal units are operated as an integral part of the parent unit in which they are located, there is little data available which applies to internal units alone, other than for their classification date, county of location and acreage. There is no information available for internal units in other data categories such as public use facilities, visitor attendance, operating costs, staffing, and the like. Any information of this type which is relevant to an internal unit would be included as part of that type of information which is relevant to the parent unit as a whole.

Table C-1 provides the available data for internal units.

### Minor System Properties

In addition to the State Park System’s 278 classified units and major unclassified properties, there are a handful of minor, usually very small properties, which are arranged by the State Park System. Not being part of the standard Department, they are not listed in the table in Chapter 3. They are usually managed by the headquarters office of the State Park System district in which they are located.

Table C-2 provides the basic information on these properties.

## APPENDIX E - OTHER SOURCES OF STATE PARK SYSTEM DATA

Chapter 5 identified departmental sources that continually generate data and information about many of the field activities and operations that take place in the State Park System. In addition, there exist other sources – libraries, depositories and archives – which house collections of published materials which may contain relevant information. These sources emphasize past, historic data. The most important ones are listed below.

### A. California Department of Parks and Recreation

Archives - The Department's Archives collects, organizes, preserves, and makes accessible documents with long-term or permanent value. A variety of the Department's statistical reports, resource surveys, planning studies, interpretive reports, acquisition files, leases and deeds are located in the Archives, which also houses the Department's Cultural Heritage Library. This library contains a wide variety of books and other publications, of both a scholarly and general nature, published by sources outside of the Department.

- Contact: Victoria Yturralde, Archivist II, Cultural Resources Division, California Department of Parks and Recreation (916) 651-6959; [vytur@parks.ca.gov](mailto:vytur@parks.ca.gov).

Central Records Office - This office is responsible for the systematic control of the creation, maintenance, use, and disposition of all departmental records relevant to the Department's decision-making and activities. Records include documentary materials, books, electronic data, maps, moving images, papers, photographs, sound recordings, made or received by the Department in the transaction of public business. This activity is in response to the State Records Management Act.

- Dianna Taylor, Associate Government Program Analyst, Central Records Office, Administrative Services Division, California Department of Parks and Recreation (916) 445-9013; [dtayl@parks.ca.gov](mailto:dtayl@parks.ca.gov)

Internal Departmental "Libraries" - Certain of the Department's organizational components house reference libraries and collections containing materials of value to the performance of their function. Information on various aspects of the State Park System may be sought from these sources, which are located as follows:

- Cultural Resources Division
- Interpretation and Education Division
- Natural Resources Division
- Northern Service Center
- Planning Division

## **B. Other Sources**

California State Library (Sacramento) - This library's Government Publications Section contains a vast collection of reports, surveys, special studies and yearbooks containing information on the full range of California's agencies, departments, bureaus and boards.

Contact: Reference Desk, Government Publications Section, California State Library, 914 Capitol Mall, MS E-29, P.O. Box 942837, Sacramento, CA 94237-0001; 916-654-0069; 916-653-6114 (fax); email: [cslgps@library.ca.gov](mailto:cslgps@library.ca.gov). Hours of operation: 9:30 AM-4 PM, Monday-Friday.

National Association of State Park Directors – Annual Information Exchange series. - Starting with fiscal year 1979, this organization has produced an annual statistical report which encompasses all of the nation's state park systems. Each lengthy report contains many data series, including acreage, facilities, attendance, and information on each system's fiscal and personnel matters. In some categories, this Department's definitions (and thus its data) must be altered to fit the needs of the NASPD publication.

- Contact: NASPD, 8829 Woodyhill Road, Raleigh, NC 27613; (919) 676-8365  
<http://www.naspd.org>

## **PUBLICATION CREDITS**

The following Department staff members contributed to the development and publication of the *California State Park System Statistical Report: 2004/05 Fiscal Year*.

### Creation of the Basic Document

- Barry R. Trute, Planning Division
- Alexandra Stehl, Park and Recreation Specialist, Planning Division
- Bruce Kennedy, Senior Park and Recreation Specialist (retired)
- Philip Carey, Exhibit Designer/Coordinator, Interpretive Publications Section

### Providers of Data, Information and Other Valuable Assistance

- Wendy Nodohara, Associate Budget Analyst, Budget Section, Administrative Services Division
- Cathy Zehnle, Accounting Administrator, Business & Fiscal Services Section
- Kim Snyder, Associate Governmental Program Analyst, Office of Acquisition and Real Property Services
- Mary Veliquette, Associate Governmental Program Analyst, Facilities Support Division
- Louis Nastro, Special Assistant to the Park & Recreation Commission, Director's Office
- Philomene Smith, Associate Park and Recreation Specialist, Planning Division
- Adrienne Tillis, Planning Division Webmaster, Planning Division

### Contributions From Individuals Outside of the Department:

- Janet Coles – California State Library
- Jim Maddox – retired from Department - back cover drawing
- Dale Wilson – retired from Department - historic postmarks

## NOTES
